Personal Care Products Without PFAS And Other Contaminants

www.ewg.org/ewgverified/

What are PFAS?

PFAS = per- and polyfluoroalkyl substances
aka "Forever Chemicals"

- Contain strong, hard-to-break bonds between carbon and fluorine atoms, leading to build up in the body and environment
- Exposure from items like food, fabric, and drinking water

Air Pollution in South Los Angeles

Common air pollutants in LA:

- Ammonia
- Particulate Matter
- Volatile Organic Compounds (VOC's)
- Toxic Metals
